

Overhead Door Adds Two Screw-Drive Openers

In March, Overhead Door announced its new Odyssey 1200 and Destiny 1500 garage door openers. The new models feature Power Plus DC motors with a 3/4-HPc* (*horsepower comparable) lifting rating, which means the motors exceed the company's lifting force specification for 3/4-HP openers.

The Destiny 1500 motor has the most power output of any Overhead Door opener in the product portfolio. The two models offer opening speeds of 10"/sec. (Odyssey) and 12"/sec. (Destiny) and include a motion detection system that activates garage lights.

Both are built with solid steel screw drives and are designed to "never need maintenance or lubrication." Their patented direct-drive configuration includes no gears, chains, or belts to wear out.

The two models include DoorDetect Monitoring and Diagnostic Technology, which delivers the power needed at every movement of the garage door and continuously monitors the operation of the door, stopping operation when significant changes occur. www.overheaddoor.com ■

Amarr Adds Cortona Design to Classica Collection

In May, Amarr Garage Doors introduced the Cortona design as part of the company's Classica Collection. The Classica Cortona is a stamped-steel, long-panel, beadboard design.

Amarr offers Cortona in the Classica 1000 (non-insulated), the Classica 2000 (vinyl-backed polystyrene insulation), and the Classica 3000 (polyurethane insulation with steel interior and exterior). Cortona is available in all current Classica options for colors, windows, section heights, and decorative hardware.

Genie Introduces TriloG Screw-Drive Openers

In March, the Genie Company announced two new Genie openers, the TriloG 1500 and the TriloG 1200. The TriloG 1500 and 1200 openers provide 1 HPc* and 3/4 HPc* (*horsepower comparable) Power Plus DC motors and direct-drive screw systems.

Both openers feature an adjustable speed setting with opening speeds up to 12"/sec. (TriloG 1500) and 10"/sec. (TriloG 1200). The direct-drive screw system is designed to be maintenance free.

For easy installation, both units have interchangeable C-channel rails, power heads that weigh less than 12 lbs. and attach to the rails with just six screws, quick-connect wiring, and SmartSet Electronic Programming for quick adjusting of limits and force.

Both also feature a motion-detecting light system and technology that continuously monitors the operation of the door, stopping operation when significant changes occur. Additional information is available from Genie and Wayne-Dalton representatives. www.geniecompany.com ■

Martin Announces California Door

In April, Martin Garage Doors introduced the California Door, a competitively priced residential garage door.

The California Door features a low-profile hinge for finger protection. Available in two colors, white mist and light almond, the door comes in three panel designs: grooved, short raised panel, and long raised panel.

Martin's Controlled Descent Device, windows, insulation, and powder coat paint are all available at an extra cost. www.martindoor.com ■

Commercial Door **OPERATOR**

Manaras-Opera is extending their well-known OPERA brand name across its entire line of Commercial Door OPERATORS. Over the years, the OPERA brand name has become synonymous with innovation and reliability. The high quality products you have come to expect from us will now be backed by the OPERA brand name.

When you think
Commercial Door OPERATORS,
just think **OPERA.**

Clopay Offers New Rolling Fire Door

In March, Clopay introduced the Model CERD20 insulated rolling steel fire door, which is UL and FM labeled to protect standard and oversize openings for up to four hours. It can also be "S labeled" for air and smoke infiltration. The door is approved for face of wall or between jambs mounting to steel or masonry in both interior and exterior walls.

With a 5.3 R-value, the door features a 7/8" insulated curtain. The mineral wool insulation also helps reduce sound transmission (STC 27) and maintain fire wall integrity. The insulation flame spread and smoke development index factors are zero.

A host of standard options are available, including an E-Z reset feature. The Model CERD20 can also be designed for specific wind-load requirements and seismic-performance validation. www.clopaydoor.com ■

Genie Adds IntelliG Openers

In March, Genie introduced the IntelliG 1200 and the IntelliG 1000 garage door openers. The IntelliG 1200 offers adjustable speed up to 9"/sec. and a motion-detecting light system.

IntelliG openers include 3/4-HPc*
(*horsepower comparable)

DC motors and
GenieSense
Monitoring
and Diagnostic
Technology which

continuously monitors the operation of the door, minimizing noise and door wear and tear.

Available from Genie and Wayne-Dalton reps, the two units also have interchangeable C-channel belt and chain rails, power heads that weigh less than 8 lbs. and attach to the rails with just 4 screws, quick-connect wiring, and easy setting of limits and force. www.geniecompany.com ■

Amarr Adds New Oak Summit Design

In May, Amarr Garage Doors introduced a long-panel beadboard option for its Oak Summit Collection. The design is stamped on a steel door for a carriage door look.

The new design is available in all optional Oak Summit colors, window inserts, decorative windows, and decorative hardware. www.amarr.com ■

FlexiForce Introduces New Counterbalance Overlay

In May, FlexiForce introduced its 350-Series Contoured Counterbalance Overlay (CCO) for a finished appearance to the inside of the door. The 350-Series CCO covers all hardware and masks the counterbalance system. It is available in black or white for all door types up to 16' wide.

The system is installed with simple wall-mounted brackets, and the overlay is easily cut to size and snaps into place. It can also be quickly dismantled and reattached for service to the spring system. www.flexiforceusa.com ■

Clopay Adds Four New Coachman Designs

In March, Clopay added four new design options to its Coachman Collection of steel and composite carriage house doors.

“The additional designs reflect the most requested custom overlay configurations Clopay receives for Coachman doors,” says Pat Lohse, vice president of residential marketing. Adding the designs to the standard options will help expedite ordering and delivery.

The new designs are available with all Coachman Collection options.

BEA Simplifies Automatic Swinging Door Operation

BEA recently introduced the new Enhanced Door Position System (EDPS) to improve automatic door operation.

The EDPS can be installed on any new or retrofit swing door system and works on AC, DC, PWM, pneumatic, and hydraulic operators. Its sensor uses an advanced gyroscope to accurately determine the door's position, resolving issues caused by stack pressure, manual push operation, or foreign objects that prevent the door from fully closing.

Janus Releases New Round Hood

In May, Janus International released a new round service hood as an alternative to the standard structural half-hex design. Pre-finished round hoods are sometimes required to match previously installed products or to meet specifications.

The hood is designed to replace all manufacturers' designs and is available in six standard finish paint colors, #4 brushed stainless steel, or clear anodized aluminum. It may be requested as a one-piece design in widths to 16'4" and in multiple-piece configurations for any width or height opening. www.janusintl.com ■

Linear Adds Features to Gate Operator Controller

In March, Linear added new features and programming enhancements to its APeX gate operator controller.

The updated v1.3 controller is used in the SL slide gate operator, the SW swing gate operator, and the LRA residential swing gate operator. It will soon be added to all other Linear gate operators.

The new improvements include a selectable safe anti-tailgate feature, an automatic close command if gate is off limit (with countdown), expanded radio range, constant pressure to operate, and more. www.linearcorp.com ■

Denco Introduces Decorative Magnetic Hinge

In March, Denco Marketing announced that they will distribute decorative magnetic hinges for steel carriage house doors. The hinges apply easily and hold firmly to all steel garage doors.

“This decorative hinge looks more realistic than any I've seen,” says Dennis Schlabach, president.

Made of flexible magnetic material with a deep embossed design and a simulated hammered finish, the hinges have been UV and field tested for over a year with excellent results. They are available in sets of four.

Clopay Adds New Hardware Designs

In May, Clopay announced several new designs of garage door decorative hardware, all constructed of rust-resistant, lightweight, powder-coated cast aluminum.

New designs include Spade (strap hinge, lift handle, and step plate), Colonial (strap hinge, handles, and step plate), an 18" Tuscan strap hinge, and an 18" Mediterranean strap hinge. www.clopaydoor.com ■

Alto Announces New Security Door

In May, Alto Garage Door announced the Securlite line of garage doors.

Made of a 2"-thick aluminum frame and expanded aluminum panels (with or without screens), the door is made for applications that require air flow and security. Alto offers both double track and switch track installation options.

Gavazzi Launches New Push Button Boxes

Carlo Gavazzi recently launched the PBBOX series of plastic enclosure boxes for push buttons and pilot lights. A push-pull mushroom button provides another option for stopping machinery, and the EMPB series allows emergency stops.

The PBBOX is economically priced, featuring UL-listed ABS plastic, black base with grey or yellow covers, and multiple sealed cable gland knockouts. www.GavazziOnline.com ■

Vitector Announces Commercial Installation Kit

In March, Vitector Fraba announced an installation kit for commercial environments. The kit includes two sections of flexible conduit (one for each photoeye) to protect the wiring from mechanical influences.

Also included is a pair of weatherproof junction boxes to shield the electrical connection from dirt and water. Knockouts in the junction box allow for jumping into standard 1/2" conduit.

www.vitector.com ■

Clopay Adds White Option to Canyon Ridge

In April, Clopay introduced a factory-painted white finish option to its Canyon Ridge Collection of garage doors.

The white finish will be popular where shake shingle cottages and colonial clapboard home styles are popular, such as in the Northeast, says Pat Lohse, vice president of residential marketing.

The finishing process includes two coats of white paint followed by a top coat. The doors are delivered pre-finished or can be finished on site.

FlexiForce Adds Vinyl Stop Molding

In May, FlexiForce announced its 1085US vinyl stop molding for garage doors. Currently provided in white, FlexiForce stop molding features a woodgrain finish with a soft pliable sealing lip that presses against the door sections.

Available for delivery in late June, the product is available in five standard lengths and comes packed with 15 pieces in one box. Other colors are expected. www.flexiforceusa.com ■

Action Industries Introduces DuraSeal Molding

In May, Action Industries introduced DuraSeal garage door molding, a new weatherseal with the look, feel, and workability of wood. DuraSeal features woodgrain embossing and is designed to be flexible, withstand extreme heat and cold, retain its color, and handle nail guns and hammers.

DuraSeal will not warp, rot, twist, or split and is impervious to moisture, salt, and insects. www.action-ind.com ■

ASO Safety Announces New Sensing Edge

In May, ASO Safety announced a new sensing edge that allows dealers and manufacturers to assemble edges by simply plugging the connector and end cap into the durable rubber profile.

The new edge reduces costs and time and is easily assembled on-site. www.asosafety.com ■
