ARROW TRU-LINE, INC.

Established in 1970, Arrow Tru-Line offers a complete line of high quality components for residential, commercial and industrial door applications. Arrow Tru-Line is based in Archbold, OH with multiple distribution points across the USA and Canada. In total, ATL operates from over 600,000sq ft of manufacturing space specializing in roll-formed and stamped metal products, with light assembly capabilities. With an ATL office staffed in the pacific-rim, importing capabilities compliment the complete line.

Including track, struts, angle, stiles, hinges, cable drums, spring fittings, cable assemblies, rollers, bearings, brackets, lock components, tube and shaft, decorative hardware, rolling door components, springs, chain hoists, fasteners and more. Basic and proprietary parts, part design and sampling, plus tooling cost optimization. Distribution points across USA and Canada.

ATL's experienced Engineering Department oversees our quality, tech support, and new product development with our customers.

FEHR BROS INDUSTRIES, INC.

Fehr, with over 150 years of International Trade experience, is uniquely positioned to provide quality and value from a variety of sources, both foreign and domestic. We supply a full line of garage door hardware to the trade, including stampings, rollers, cable, weatherseal, fasteners, lubricants, and springs. We are also a master distributor for Royal Mouldings.

We welcome inquiries for custom manufacturing and specialize in cable assemblies and small run stampings. Stampings are available with zinc, CED, or powder coated finishes. Custom packaging is available.

Our commitment to service includes substantial inventories in both our East and West Coast warehouses. Orders are typically shipped within 24 hours. Our products are available for order 24-7 from our VeriSign secured business-to-business web portal, which gives customers access to their account information, sales history, order status, and shipment tracking. For more information, call us @ 800-431-3095, or visit us at www.fehr.com/door.

INTERSTATE STEEL, DIV. OF NATIONAL MATERIALS

Interstate Steel, founded in 1946, has been in the forefront of metal supply to the Garage Door Industry for over Forty years. We were one of the first Steel Service Centers to be admitted as an associate to the National Coil Coaters Organization and began the idea of "single invoice packages" for our customers for painted steels. We have processing capabilities to meet and or exceed the most exacting requirements for painted and or bare metals. Additionally, our parent company has ownership of companies involved in the manufacturing of aluminum extrusions---galvanizing of heavy gauge materials, and an assortment of other processes. We have the largest service center chain in Mexico-

PRECOAT METALS

At Precoat Metals, we're your coil coating experts. Since Precoat's founding in 1961, we continue to expand our extensive process knowledge while at the same time dedicating ourselves to the highest-quality products and service. With nine coil coating lines to serve you, we can coat more than one million tons of metal each year.

We apply protective and decorative coatings to coils of steel and aluminum in a continuous process precisely calibrated to provide consistent, even coating of the substrate. If you're seeking differentiation, then we can take your product to the next step with our innovative printing or laminating capabilities, which include wood grain designs. In addition, we offer supporting services such as embossing, tension leveling, electro-galvanizing, slitting and cut-to-length.

There's no substitute for 50 years of hands-on experience. We continuously improve our lines and coating systems, add value to every project - and we proudly deliver on our promises. Precoat Metals has facilities in Baltimore, MD, Birmingham, AL, Granite City, IL (2); Houston, TX; Jackson, MS; Portage, IN, and St. Louis, MO..

ROYAL BUILDING PRODUCTS

Royal Mouldings, the largest marketer and manufacturer of decorative polymer mouldings and cellular vinyl extrusion components in North America, announces the industry's best selection of door components and garage system components for energy efficiency, low maintenance and upgrading the area to more family space for the homeowner.

- **Garage Solutions™: Thermo Garage Trim Systems** – A low maintenance, moisture resistant, termite proof Cellular PVC product group which totally eliminates the problems of wood and metal systems. The program consists of: Thermo Stop®, Door jamb, brick mould and casing-backband. Each piece is carefully designed to work closely together to insure ideal appearance with energy efficiency and low maintenance.
- **Garage Solutions™: Overlays™** - Overlays consists of a unique group of products designed to upgrade the exterior of all garage doors to a carriage door appearance with a no rot, low maintenance prefinished and ready-to-stain cellular PVC trim system consisting of 1x2, 1x4, 1x6, 1x8, 1x10 and 1x12 sizes. The Overlays garage components are moisture proof, mold resistant, and add value to the home.
- **Garage Solutions: Everdry™** - Everdry wall system includes a specially designed baseboard and wall board that when cleaning keeps the water and residue from seeping behind the moulding and wall. It does not promote mold. The beaded wall board and cap adds beauty and offers protection from moisture.
- **Pro Frame®** entrance and patio door system is the industry's only totally no-rot, low maintenance door system with an all cellular vinyl and composite entry frame. Proframe includes one of the industry's best and largest assortments of exterior and interior trim profiles available and has received NOA number 02-0408.05 Miami-Dade County Florida expiration date April 3, 2008 for these components. Proframe's unique system is waterproof from the top to the bottom of the frame, with no wood construction used. The system is available painted and ready to stain for steel and fiberglass doors. The original factory applied finish is covered by a 10-year limited warranty for UV degeneration. Proframe is available in lineal or prepackaged kits and also provides the industry's largest selection of sizes, including 4 9-16", 5 ¼", 6 9-16", and 6 13-16". The cellular vinyl is combined with a composite post-treated filler core that further strengthens the product.

STEEL DYNAMICS, INC.

Steel Dynamics is a world-class steel mini mill, headquartered in Fort Wayne, Indiana. Our flat-rolled division produces 2.5 million tons per year of high quality Hot Rolled, Cold Rolled, Hot Dipped Galvanized and Galvannealed steel. Our innovative post-annealed galvanized steel is being used throughout the industry as a low-cost alternative to expensive DDS and IF steels typically necessary to satisfy the demanding forming requirements that characterize raised panel garage doors. The recent start-up of our ultra light gauge galvanizing line in Jeffersonville, Indiana, further expands our product offering to include material as light as .008” in thickness. We have also recently completed construction of a new continuous coil coating line adjacent to our flat-rolled mill, allowing us to provide low-cost, high-quality prepainted steel to the garage door industry. The coil coating line incorporates tension leveling and in-line continuous color measurement to ensure we can satisfy the quality requirements of even the most demanding garage door applications.

Company Name: Steel Dynamics, Inc.
