

## New LiftMaster Control Panel Retrofits GDOs for MyQ

In January, LiftMaster announced its 888LM MyQ Wall Control Panel that upgrades LiftMaster GDOs manufactured after 1998, adding MyQ and Security+ 2.0 technology.

The 888LM allows homeowners with these older openers to control and monitor their garages from anywhere using a smartphone or Internet-enabled device by adding the Internet Gateway (828LM) or Garage Door Monitor (829LM). Plus, with Security+ 2.0 capability, the openers are retrofitted with greater radio range performance and decreased the likelihood of interference problems.

Other retrofitted features include timer-to-close, alert-to-close, and motion detection. The 888LM can be purchased individually or in bundle packages. [www.liftmaster.com](http://www.liftmaster.com) ■

## Martin Door Introduces Wood-Look Composite Door

On Feb. 1, at its annual Dealer Summit, Martin Door unveiled the Chalet, a composite wood-look garage door.

The Chalet features composite wood overlays on a 2"-thick insulated Martin steel door with a steel back. The composite cladding comes in clear cypress or pecky cypress, and the door comes in stain finishes of walnut, dark, light, or white. [www.martindoor.com](http://www.martindoor.com) ■

## LiftMaster Launches Single-Sided Photo Eye for CDOs

In February, LiftMaster launched the CPS-RPEN4 Monitored Retro-Reflective Photo Eye, the market's first single-sided monitored reflective photo eye. The UL 325-compliant photo eye is designed to reduce material and labor costs for commercial and industrial applications.

The CPS-RPEN4 allows the technician to run less wiring and install the unit in up to 30 percent less time than standard photo eyes. Its design also allows for simpler and faster alignment than any other model on the market.

## Clopay Introduces Flush Ultra-Grain Door

In January, Clopay introduced the Cypress Collection, an insulated flush steel door with the company's Ultra-Grain wood-like paint finish. The new line features three-layer construction, energy efficiency, and quiet operation.

Insulation options include 2" or 1-3/8" polyurethane or polystyrene with R-values ranging from 6.5 to 18.4. Two finish colors are offered: medium or walnut. Complementing window frames, grilles, inserts, and decorative hardware are also available. Cypress Collection colors complement the stain options for Clopay's Energy Star-qualified fiberglass entry doors. [www.clopaydoor.com](http://www.clopaydoor.com) ■

## Raynor Adds 2" ThermaSeal Door

In December, Raynor announced the addition of a 2" door to its line of ThermaSeal sectional thermal doors. The ThermaSeal TM200 offers an R-value of 18.3 and is available in white and in widths up to 36'.

### Amarr Expands Olympus and Designer's Choice Collections

In February, Amarr Garage Doors added to its Olympus and Designer's Choice collections of garage doors. Both collections now offer six panel designs, are available up to 20' wide, and come in five colors: true white, almond, wicker tan, sandtone, and dark brown. [www.amarr.com](http://www.amarr.com) ■

### DoorKing Introduces Wireless Expansion

In February, DoorKing introduced wireless expansion boards for its 1830 series of telephone entry and access control products. The new boards make it possible to add up to 16 card readers to an access control system without the need for additional wire runs.

The DKS expansion boards will connect card readers, keypads, or just about any 26-bit Wiegand device. Each board also acts as a repeater station to provide for longer distances. Individual repeater units are available for applications in which an access control device is not needed.

Richard Sedivy, director of marketing, says these wireless boards simplify installation, save time, and simply need a power source at the entry point.

### Hörmann Flexon Introduces Machine Protection Doors

In February, Hörmann Flexon announced two models of machine protection doors: Speed-Commander 1400 MP and Speed-Master 1600 MP.

The Speed-Commander 1400 MP is available with a 58-oz./sq. yd. puncture-resistant panel, while the Speed-Master 1600 MP has a 1/8"-thick Bulldog panel. Both models protect personnel by separating equipment from work areas, and they feature Class 4 safety switches that verify when the door has closed.

## Clopay Full-Vision Doors Qualify for LEED Credits

In February, Clopay announced that its Models 902 and 903 full-vision doors and doors with full-vision sections qualify for both Daylight and Views LEED credits under the Indoor Environmental Quality category.

The LEED Daylight credit applies to glazing materials that allow natural light to enter “regularly occupied spaces” of a building. The Views credit applies to glazing materials that allow building occupants to have a direct line of sight to the outdoors. Frosted or obscure glazing does not qualify.

Documents required by the building contractor to complete LEED certification have been updated to reflect this change and are available on the Clopay dealer portal at [www.clopaydealer.com](http://www.clopaydealer.com). [www.clopaycommercial.com](http://www.clopaycommercial.com) ■

more  
flexibility

More flexibility means a lean organization with the ability to quickly adapt to instantly changing business environments and production design requirements, as well as providing more rapid response times to customer needs and inquiries. It provides a culture where change is accepted and embraced, allowing us to provide an individualized service offer that meets your unique criteria. It means assistance in designing an engineered coating system or in converting end users from post-paint to pre-paint to save capital, reduce work-in-progress inventory, free up warehouse space to make additional product and minimize material handling, environmental concerns, and insurance costs. ## Linear Adds Z-Wave Products

In January, Linear announced the addition of Z-Wave products to its line of wireless residential and commercial products. As a result of purchasing certain assets from Advanced Control Technologies, Linear will manufacture and sell a Z-Wave product line that helps to bring appliances, lighting, and other security systems into an integrated wireless network.

Z-Wave is an international wireless standard for intelligent, interoperable, low-power, RF mesh networking technology. Z-Wave-enabled products represent the world’s largest network of interoperable smart products. [www.linearcorp.com](http://www.linearcorp.com) ■

## Hörmann Adds Commercial Window Options

In January, Hörmann unveiled expanded window options for commercial applications with its new Opti-View section option. Opti-View sections offer the look and feel of a full-view section while maintaining the superior features of an insulated painted steel section with pinch-resistant section joints.

Clear single-pane tempered glass is standard for both insulated and non-insulated doors. The Opti-View sections are offered as an alternative window section for use in commercial doors. [www.hormann.us](http://www.hormann.us) ■

## Schweiss Doors Introduces Spherical Bearings

In December, Schweiss Doors announced added spherical bearings to its hydraulic one-piece doors. All Schweiss “Red Power” hydraulic doors are now built with spherical bearings that assist the safe and smooth operation of the door.

No one else in the industry has adopted this feature. Spherical bearings allow for less friction, take up any flexing of the door frame, and eliminate binding, wear, and damage to a door cylinder. [www.schweissdoors.com](http://www.schweissdoors.com) ■
