D+AS show guide

The *D+AS Show Guide* is a special DASMA publication that highlights key exhibits and products featured at the Expo and AFA Fencotech shows. This year's *Show Guide* includes information about the companies and hot products that you may have missed from the shows.

Our Pages feature industry companies that invested in this extra effort to inform you of key announcements, services, and products that were showcased at their exhibits.

Our Readers are 20,000 professionals in the door, gate, and access control systems industry throughout North America.

Our Advertisers are DASMA members and industry companies that exhibited at the 2024 Expo and/or Fencotech events. To learn about advertising in the next Show Guide, visit www.dasma.com and go to the Publications/D+AS Show Guide page.

MIDLAND GARAGE DOOR

Midland Garage Door plank options turn heads at Expo

Midland Garage Door introduced horizontal woodgrain plank designs for their residential ThermoGuard Flush models. The nonrepeating Plank colors are available now and offered in four distinct colors: Carbon Oak, Cedar, Mahogany, and Oak. Attendees were able to examine all four gorgeous new woodgrain options at Midland's booth.

Midland Plank colors are the perfect choice for modern, contemporary, or traditional home designs. They are built to resist fading and discoloration and are offered in a variety of window configurations.

NEW PLANK WOODGRAINS: Available in Carbon Oak, Cedar, Mahogany, and Oak.

A message from Midland Garage Door

Arrow Tru-Line raises money for a worthy cause

At Expo, Arrow Tru-Line (ATL) was on a mission to educate people about a worthy cause. When vice president of sales and operations John McLaughlin learned that friend and industry icon David Hutzler was diagnosed with ALS (Amyotrophic Lateral Sclerosis) he knew the company had to do something.

The Expo event presented an opportunity to inform attendees about the debilitating disease while raising money for those suffering from it. ATL's booth featured towering displays promoting the ALS Therapy Development Institute with the tagline "Moving Forward, Striking Out ALS Together."

After the show, the company hosted an event to kick-off their ongoing ALS fundraiser. To date, they have raised over \$11,000 with a goal of \$25,000.

To donate, scan the QR code above. Together, we can "Strike Out ALS."

Garaga announces new, on-trend products

2023 was a record year for product launches at Garaga with over 15 new offerings. Most of the exciting new products were on display at Expo including the 40"x7" Slim Window. The new modern window option features a smooth, straight frame molded in one piece for a clean, unadorned, straight-line look. The Slim Window is offered at a competitive price equivalent to Garaga's standard large-format windows, which allows dealers to offer the new window as a standard upgrade at no additional cost.

The company also showcased their new stamp designs. The Village Collection 4-Slat base carriage house door in Dark Walnut color and the eye-catching Standard+ Vog contemporary door featuring the on-trend Iron Ore color were both predominantly displayed in their booth.

Garaga also announced that their polyurethane-insulated and full-view products are now available through their Bemidji, Minn. location. Garaga's goal is to continue to launch relevant, on-trend products and to continue to meet the needs of their dealers and customers.

DENCO
Where Door & Gate Pros Go!

Denco acquisition means new resources, same committed service

Expo provided an excellent platform for Denco to promote their exciting news. In December, the company was acquired by Michael Stitzlein, local businessman and president of Tricor Industrial Inc. of Wooster, Ohio. The strategic move positions Denco as a sister company to Tricor Industrial, Inc.

Tricor is a reputable family business with six locations in four states and over 200 employees.

While the operations will be run independently, Denco will now have access to over 30,000 SKUs currently offered by Tricor, boosting the company's potential to serve their valued customers even better.

▲ NEW PRODUCT LINE

They also announced the addition of the Milwaukee Tool product line to their extensive inventory. Denco is committed to offering top-notch products and upholding the legacy established by Dennis Schlabach in 1967. Stitzlein said, "It will be business as usual, with new resources and additional capabilities to serve our customers better."

A message from Denco

With a solid track record of 57 years, Denco has established itself as a reliable ally for door and access dealers. We offer our customers an unwavering commitment of providing excellent customer service, high-quality products, and advantageous pricing now and well into the future. www.dencodoorstuff.com

ArmRLite promotes windload-approved and ADA-compliant products

At Expo, ArmRLite Overhead Doors showcased their customizable aluminum and glass hurricane products, including their recently launched WZ3D Impact and Wind Load Tested Florida Product. The WZ3D door was approved by Florida. [Approval #46038]

The WZ3D joins the company's previously approved and well-established Custom C.I. model [Approval #FL32416]. Both models boast a 20-year welded frame warranty.

The ArmRLite booth also highlighted their ADA Compliant Pass Door designed for residential and commercial applications. The Pass Door features a unique door within a door design, and it is specifically engineered for easy and smooth wheel chair pass through access with no step-over like traditional pass doors have.

◀ No step-over like traditional pass doors.

A message from ArmRLite

ArmRLite's sectional overhead door hurricane products are designed to withstand harsh weather conditions and help protect commercial, residential, and municipal buildings, such as fire stations, from severe storm damage. www.armrlite.com

TRIED & TRUE

AMERICAN MADE SPRINGS THAT STAND THE TEST OF TIME

When we say our springs are made in America, it isn't just a location. It's about our dedication to standards of *quality, strength, & innovation*. Where others fall short, we outlast. Call our sales team at 833.772.3667 about our American manufacturing process.

Service Spring manufactures doors too!

Service Spring Corporation (SSC) dropped huge news at Expo. The company now manufactures garage doors! SSC employees and customers were buzzing with excitement because they are now a one-stop-shop, full service manufacturer for the garage door industry.

SSC's new Invicta garage door line is manufactured at the same and now expanded plant in Ohio, where the company has been manufacturing quality products for decades. The exhibit featured three construction models, Model 06, 14, and 18, eight standard colors, six panel stampings, and three premium wood tones. Each model is engineered for different applications ranging from non-insulated to insulated polystyrene sandwich doors.

The new DuraMaster Spring was also unveiled at Expo. Its proprietary manufacturing process ensures a remarkable 15,000-cycle lifespan without having to increase the size of the spring. Customizable powder coating and stenciling options are included and enhance brand visibility for professional door dealers.

SSC also highlighted its superior service center network, which includes nine distribution centers with another facility scheduled to open in summer 2024. The network offers exceptional lead times and now, the potential for consolidated door and accessory shipping charges.

A message from Service Spring

Founded in 1962, SSC has a legacy of delivering top-quality, American-manufactured garage door springs and unmatched customer service for over four generations. The company remains committed to innovation, boasting a wide range of replacement parts, operators and springs for the professional garage door dealer. www.servicespring.com

Wayne Dalton impresses with new collection and dock equipment

Wayne Dalton showcased its new Woodgrain Impressions Finish Collection on its popular Classic Steel Model 8300. The new collection utilizes the latest technology to deliver the highest quality, digitally printed wood finish, combining the realistic look of wood with the durability and resiliency of steel.

▲ NEW: DaltonDock Equipment

▲ NEW WOODGRAIN COLLECTION: Carbon Oak

Wayne Dalton is the only manufacturer in the industry that constructs doors and loading dock equipment. At Expo, they highlighted their Commercial Sectional CX Series and their exciting new DaltonDock Equipment.

The new product offering cements their position as the source for total dock and door solutions for warehouse and dock applications. The new suite of dock products includes levelers, seals, shelters, and accessories. With this new product offering, the company can fully outfit the entire application.

A message from Wayne Dalton

For over seven decades, Wayne Dalton has served as your trusted total solutions provider. ACCESS & DOOR HARDWARE

GUARDIAN ACCESS & DOOR HARDWARE

Guardian highlights “smart” products

Guardian Access & Door Hardware highlighted the model 928V residential jackshaft garage door operator (GDO) with optional beam plug-in Wi-Fi Smart controller. The V3 is the first model in a new line of Guardian GDOs that combines high value and modular features.

Attendees were able to view the enhanced GDO, which now includes Wi-Fi battery backup and several optional drive system upgrades. Guardian allows customers to select and add upgrades when needed, so they are never paying for an unused feature. The “only pay for what you need” structure leads to more satisfied customers, lower inventory carrying costs for dealers, and more competitive ability when quoting new jobs.

The company also showcased new Medium Duty Commercial Jackshaft and Hoist Operator models: the MDJ-50-11 and MDH-50-11. Both operators are built with an advanced logic board with LCD display for easy programming.

► Plug-in WiFi
Smart Controller

A message from Guardian Access & Door Hardware

Guardian is a global company specializing in the design and manufacture of garage door operators, die castings, hardware, and plastic moldings for the garage door industry, serving markets in Africa, Asia, Australia, Europe, and the United States. www.adhguardianusa.com

Clopay products more than stack up

◀ VERTICAL STACKING DOOR SECTIONS

▼ Shown in popular dark, Iron Ore color.

Clopay Corporation's booth highlighted a mix of products from their various brands. VertiStack was one of the more eye-catching displays at Expo. The clear aluminum and glass door features vertically stacking sections, minimal lines

and angles, and no hinges or exposed tracks.

The unique engineering cleverly hides key mechanisms and provides clear, open ceiling space. An ideal choice for outdoor living spaces and other applications where headroom isn't a concern. Vertistack is currently available for the commercial market. A residential version will be introduced this summer.

Clopay also introduced Canyon Ridge Elements, an entry-level addition to its Canyon Ridge line of faux wood carriage house style garage doors. The new line combines "elements" of their Canyon Ridge and Coachman models by pairing woodgrain textured composite overlays with modern, square edges and durable, insulated steel.

Elements is available in 13 designs in seven standard paint colors with optional windows and decorative hardware.

A message from Clopay Corporation

Founded in 1964, Clopay Corporation is the largest manufacturer and marketer of garage and rolling steel doors in North America, with four manufacturing facilities and more than 50 distribution centers. The company sells under the brands Cornell and Cookson, Clopay, Ideal, and Holmes. www.clopaydoor.com

Clopay is your committed partner in providing customizable garage doors. We offer time-saving resources and a wide breadth of styles, so you can build a better business — and have happier customers.

National Door Industries introduces installer-friendly products

National Door Industries (NDI), the leader of engineering and manufacturing windows/ decorative insert trims for the garage door industry, showcased how they are a one stop shop for most all of your garage door needs. NDI displayed their full selection of residential and commercial frames and impact resistant windows, which are designed to meet all wind-load applications. They also promoted the company's ISO 9001 certification.

NDI also announced that their small extender clips are now available in shorter lengths, including 4', 4'2", 5', 5'2", 6', and 6'2". The Xtreme Duty 400XD lubricant was another new product featured at their booth. The heavy duty multi-purpose, rust preventative lubricant now offers even more protection and features a new citrus scent.

▲ **EXTENDER CLIPS:**
Now offered in shorter lengths.

► **XTREME DUTY:**
New Citrus scent.

A message from National Door Industries

NDI is a family-owned and managed company that has been supplying the industry for over 56 years. We engineer, develop, and produce the highest quality window frames and insert trim products for our customers and O.E.M. partners. Hörmann launches fastest coiling door in the world

Hörmann's booth showcased its vast line of sectional, commercial high-speed/high performance, and industrial doors, but it was the new SG 5040 TurboLux that stole the show. The TurboLux is the

fastest non-contact coiling door in the world and features robust, impact-resistant polycarbonate sections with 90% transparency. It can withstand the demands of rough, everyday industrial use.

With an opening speed of nearly 12' per second, this high-performance rigid door is modern operational efficiency at its best. The springless operation ensures a service life of more than 1 million cycles, which drastically reduces maintenance costs.

Also on display was the HPP impact traffic door designed to accommodate a variety of traffic in demanding warehouse, food, and cold storage operations. HPP's solid polyethylene PE 500 panel material is impervious to moisture, acids, and alkalis, and is crack-resistant and USDA/FDA/EU compliant.

A message from Hörmann

Our roots are with the German-based, family-owned Hörmann Group, who has been manufacturing doors for nearly a century. With manufacturing locations across North America, we deliver cutting-edge production processes and industry-leading lead times. www.hormann.us

Thank you IDA!

2024 Industry Member Service Award

**MAKING YOUR WORLD
A SAFER PLACE**

We're honored to have the confidence and trust of door dealers!

Miller Edge earns IDA award and launches mounting channel

Miller Edge received the IDA 2024 Industry Member Service Award for its continued excellence in business, contributions to IDA, and industry and product innovations. CEO, Bearge Miller, and newly appointed President, Flossie Miller, accepted the award on behalf of the company at the IDA Expo banquet and awards ceremony.

At Fencetech and Expo, attendees had the opportunity to check out the new MC271-C7 mounting channel. The innovative new channel significantly reduces installation time and labor costs on applications that require an edge sensor for a rolling steel door with a double L-angle bottom bar.

Installers can easily clip on the channel, slide in the MC271-C7 edge sensor, and wire the operator. The easy-to-install channel is a convenient safety edge upgrade for rolling steel door applications.

A message from Miller Edge

Miller Edge is the go-to source for door dealers' safety product offerings. We offer a complete line-up of safety products for motorized commercial doors, including photo eyes, light curtains, and edge sensors – all UL325 recognized for compliance with commercial door safety standards. www.milleredge.com

XS

Amarr showcases Northwoods plank door

Amarr highlighted several new products at Expo, including their new Northwoods (NW3138) modern plank garage door. Northwoods features a printed horizontal plank design on a ribbed section which creates depth, texture, and dimension. Northwoods is a perfect complement to modern, mid-century modern, and traditional architectural styles.

The new door has multiple window variation options. Select traditional or mosaic window placement for either standard Short Panel or Long Panel windows with color-matched frames or the new SlimLine window with Black frame. Additional features include the triple-layer construction with polystyrene insulation, which offers durable and reliable performance for many years.

The Axolotl for Amarr collection was also a showstopping display. The luxurious residential and commercial garage combines the Amarr aluminum frame with sustainable, architectural surfaces.

▲ NEW: SlimLine windows and Black frames.

▲ AXOLOTL: Five unique effects - Cast, Cortex, Doric (shown), Lunar, and Smooth, and four surface options.

A message from Amarr

Established in 1951, Amarr is one of the world's leading brands in design, manufacturing, and distribution of sectional doors for a variety of applications. Made in the U.S., Amarr products have a long history of innovation, high quality design, and sustainability. www.amarr.com

All the texture, without the splinters.

The **Amarr Northwoods collection** is a wood plank pattern digitally printed on a ribbed insulated section, delivering a realistic wood look with remarkable depth, texture and dimension. Available with standard or new SlimLine windows. The ideal complement to modern, mid-century modern and traditional architecture homes.

Action Industries shines light on patent-pending window system

Action Industries' booth included their extensive line of decorative windows and overlay options, and featured their Coach House Accents. Their American made window systems, overlays, and hardware are made from the highest quality materials, designed to improve curb appeal, and built to last.

The company's patent-pending Commercial Window Systems were a focal point. The new window product is a unique and convenient add on designed for commercial doors. The faux window solution combines the look of windows with the security and privacy of a solid door.

The custom and configurable/universal window system is resistant to UV and extreme weather conditions. Color-matching and painting options provide a seamless blend between the window system and the door. The flexible window systems are designed for a variety of applications.

Windsor Door targets home builders with two new doors

Over the last year, Windsor Door has significantly expanded their manufacturing capabilities and capacity, adding a new high-speed manufacturing line that targets U.S. home builders. The enhancements allow them to offer even higher quality doors and shorter lead times.

At Expo, Windsor Door launched two new builders' models. The 1030 and 1035 are completely new designs, featuring four emboss options, unique design styles, and updated packaging. The company is focused on delivering quality products, like models 1030 and 1035, at the value price point that builders expect.

Windsor also promoted their "retro" products. Model 750 is a 24-gauge door at a competitive price point sold with 14-gauge hinges, 10 ball rollers, and two springs on double doors. The Model 790 is a 2" thermally broken sandwich door that offers a 25-gauge face and interior skin. Both models will target the replacement segment and are available in many colors, four emboss options, heavy hardware, upgraded rollers, and two springs on double doors.

▲ AVAILABLE NOW: Two new builder models: 1030 (shown) and 1035.

A message from Windsor Door

For over six decades, Windsor Door has set the industry standard in garage doors. Based in Little Rock, Ark., our doors are a reflection of the evolving architectural style of homes in the U.S. We are proud to supply installing partners, home builders, and custom and regional builders nationwide. www.windsordoor.com

Windsor Door

With our pioneering high-speed manufacturing line, we're turning the page on lead times and opening doors to a world where speed and quality coexist. The 1030 and 1035 series are about getting you what you need, when you need it — without compromising quality and reliability.

WHO WE ARE

ASO Safety Solutions is a global leader in tactile sensors and related technologies for 40 years, with a presence in the USA for the past 20 years.

ASO SAFETY

ASO reveals world's first safety-rated radar scanner

ASO Safety Solutions introduced the world's first safety-rated radar scanner – the LISENS Scan. The easy-to-program sensor is scheduled for release in 2025. It detects and stops movement from doors, gates, and barrier arms, and activates the access point by assigning different zones in its detection field. The LISENS scanner “senses everything” including movement, heartbeat, change in temperature, and more.

The company also highlighted their easy-to-assemble safety edges, which offer reliable and long-lasting performance in the field and include a convenient overtravel feature that prevents damage to the door or obstacle if they collide.

ASO specialists are available to support their customers with tailored safety solutions to ensure their products are UL 325 compliant and safe.

About ASO Safety Solutions

ASO is the leading manufacturer of safety edges for rolling and sectional doors, and for more than 40 years globally, a market leader for tactile sensors. www.asosafety.com

Raynor emphasizes united family of brands

Raynor Worldwide emphasized the common vision and shared core values of its family of brands: ProDoor Systems, Richards-Wilcox, and Raynor Garage Doors. The united team continues to remain focused on delivering quality craftsmanship and upholding integrity in partnerships across its entire entity.

At Expo, Raynor emphasized how each of its brands has a distinct mission. ProDoor Systems promoted its five unmatched distribution centers, which are strategically located in Ariz., Ind., Ohio, Tenn., and Texas. The facilities work together to offer seamless order processing, same day order fulfillment, and an optimized delivery radius.

Richard-Wilcox highlighted its full line of sectional doors designed for both residential and commercial applications. Featuring cutting-edge polyurethane insulation technology, R-W doors ensure uniform insulation, superior adhesion, and exceptional strength. Raynor Garage

Doors showcased its AlumaView, Encore, and EnergyCore products.

C.H.I. OVERHEAD DOORS

C.H.I. debuts striking new doors

C.H.I. introduced two eye-catching new doors from their Carriage and Contemporary Collections. The Shoreline Overlay Carriage door display was shown in Accent woodtone, Cedar Plank, and framed in black overlay. The two-tone overlay fused classic and modern methods and highlighted their vertical Plank options. Shoreline with the optional black overlay is scheduled to be released in late May.

The 2783 Sterling door was another standout new product at the C.H.I. booth. The door was shown in a unique Copper Penny color and showcased their Infinity Glass window option. This door is also available with window cutouts behind the Infinity Glass, allowing for a clean exterior view and visual access from inside the garage.

However, it was C.H.I.'s "graffiti door" that grabbed the most attention. The artistic door display demonstrated how the company can easily customize a door using the same "accent" process used in their Accent woodtone doors. This unique option is a fantastic choice for companies or organizations that want to show their logo on the exterior and/or interior of the door.

A message from C.H.I.

C.H.I., a Nucor Company, is proud to team with their dealers to provide overhead doors for residential and commercial markets in the United States, Canada, and Mexico. C.H.I. has manufacturing locations in Arthur, Ill., Terre Haute, Ind., and five service centers across the U.S. www.chiohd.com

Some Visitors Use a Different Kind of **Access Code**

1837-90

**All your gates and locks
don't mean a thing if
your entry system is
easily breached.**

DoorKing's 1830-90 Series Telephone Entry / Access Control Systems put up the toughest fight on the market with a stainless-steel case, interlocking lid, two weather seals and two locks making it extremely vandal resistant. And with the optional 10-gauge hood, it's virtually impossible to wedge open at the seams. The 1830-90 Series can be connected via the internet, cellular or plain old fashion telephone lines and can be expanded to control up to 48 access points with optional Tracker Expansion boards.

DOOR KING®

DOORKING

DoorKing crosses barriers with new products

DoorKing's sprawling exhibits at Fencetech and Expo demonstrated the company's vast product line. The DoorKing Model 1625 Wedge Barrier system was a main attraction. The formidable barrier system prevents passenger vehicles and light-duty trucks from compromising a controlled traffic lane and is crash rated to the ASTM F2656 standard, making it ideal for applications such as paid parking and rental car lots, and new car dealerships.

The 1625 is a shallow mount system, requiring only a six-inch deep concrete pad. It can also be surface mounted when excavation is not possible, such as with multi-level parking garages. Since the system uses counter-balance weights, no hydraulics are involved, making it efficient and environmentally friendly.

The 2112 Video Entry System was also highlighted at both shows. The 2112 provides real-time video of visitors and features broadcast calling for up to four phone numbers at once. The cloud-based system allows users to access and program the 2112 from a laptop, tablet, or smartphone.

A message from DoorKing

DoorKing was established in 1948 and is one of the largest manufacturers of vehicular gate operators, parking control products, and access control systems in the country. www.doorking.com

Genie enters gate market and earns Innovation Award

The Genie Company exhibited an array of products at Expo, including their new residential and commercial vehicular gate operator line. Residential versions will be available with 24V DC motors as linear actuators, slide, and swing arm models. Commercial gate operators will include 36V brushless DC motors in slide and swing arm models. All models feature advanced controls and a simplified LCD interface and will be available soon. The new product offerings mark the company's entry into the gate operator market, and attendees were excited about the additional product line.

Their booth also featured an enhanced BenchSentry® by Genie. The product was honored with IDA's Product Innovation Award during the show. The upgraded bench offers protection for packages with contactless delivery, delivery location selection, and a single app to manage security.

Enhancements include a new, more sophisticated display, a waterproof exterior, and the option to customize codes for users.

A message from Genie

Today, as The Genie Company embarks on its second century, our enduring commitment to innovation remains unwavering. Building on our rich legacy, the company continues to introduce an array of smart, connected garage door openers and accessories for residential and commercial applications, delivering safe, secure, and convenient solutions to millions of homes throughout North America. www.geniecompany.com

EMX unveils new sensing solutions

EMX Industries unveiled two new Universal UL325 photo eye products at Fencetech and Expo: the Retroreflective IRB-RET2 and Thru Beam IRB-MON2. The RET2 adapts to various operators with four monitoring interfaces: normally closed, two-wire and four-wire pulse (available in 2 and 3 frequency), and 10k resistive termination. Key enhancements include an alignment indicator, an added ball joint for increased mobility, a more compact and sleek hood, and a stealth mode upgrade that turns off the LEDs when not in use.

The Thru Beam IRB-MON2 is equipped for normally closed, two-wire pulsed (offered in 2 and 3 frequency), and 10k resistive termination. The compact, thru-beam infrared photoeyes feature an integrated hood, a removable terminal block for easy wiring, and can be used in non-monitored applications using standard NC/NO contacts.

EMX also highlighted its Patriot E Long Range RFID Reader. The circular polarized reader features a range of 18 to 25 feet, is easy to install, and communicates effectively using several protocols. Optional TCP/IP and WiFi upgrades are available.

A message from EMX Industries

EMX is one of the world's leading innovators of photoeyes, vehicle detection sensors, and RFID systems for the access control, automatic gate, and overhead door markets. www.emxinc.com

Haas Door announces 42 style options, SlimLine windows, and U-factor verification

At Expo, Haas Door announced an astounding 42 total models and styles to their American Tradition collection – the largest expansion since the series launched. It incorporates many regularly requested designs as well as new and custom styles, inverted configurations, and a v-groove base door upgrade. Haas also unveiled SlimLine windows. The long, narrow window offers a sleek and contemporary look while allowing plenty of light into the garage.

◀ American Tradition door shown in Espresso – a new earthtone color pallet.

Attendees were surprised by the extent of new options, and excited by the soon-to-be released Plank colors: American Walnut, English Oak, and Cedar. The new Plank designs add dimension and offer a high level of woodgrain detail. They are a popular addition to their unidirectional and bidirectional styles.

The company's transition to U-factor values was also fully on display. Haas is the first in the industry to have their insulated doors tested and verified with U-factor values by DASMA and the program administrator, ICC-ES. During the Expo, they hosted two seminars to educate their dealers about U-factors and the Thermal Performance Verification Program.

Help Arrow Tru-Line find a cure for ALS. Consider donating today.

Arrow Tru-Line helps strike out ALS

Industry icon and friend David Hutzler was recently diagnosed with ALS (Amyotrophic Lateral Sclerosis), formerly known as Lou Gehrig's disease. At Expo, ATL honored Hutzler and his career while raising awareness within the industry about ALS. They printed customized t-shirts, held an ALS fundraiser, and promoted the important work that the ALS Therapy Development Institute is doing to help find a cure.
